

Xantus's Murrelet (San Clemente Island) 10-50 pairs

Estimates are based on best available data from 1994-1996 surveys (HSU & USGS, unpubl. data).
Survey types: at-sea vocalization surveys, nesting habitat assessment, nest searches,
and at-sea captures.

Figure 16. Estimated number of breeding Xantus's Murrelets on San Clemente Island.

(H.R. Carter, unpubl. data, May 2002; subject to revision before final).
